

Pflanzenliste NSG Heidkoppelmoor

Aktualisierung 2014

Botanische Aufnahmen im NSG Heidkoppelmoor seit 2009 durch NABU Ammersbek

Teilbereiche im NSG:

- 1 = Moorkern und Moorbirkenwald
- 2 = Borstgraswiese
- 3 = Kleine Heidkoppel
- 4 = allgemeines (Feucht-) Grünland, inkl. Gräben
- 5 = Wälder, Knicks, Waldränder, Waldwege, Aufforstungen
- 6 = Teich und Kleingewässer, inkl. Stauteich
- 7 = Moorbek, Lottbek
- 8 = Golddistelbrache/"Taigawald"
- 9 = Froschlandteich/Heideweiher

Status = Herkunft der Pflanzen:

I = einheimisch, indigen

I? = eigentlich einheimische Art, Herkunft im NSG aber fraglich

V = verwilderte, eingebürgerte heimische Art

VG = verwilderte, ursprünglich gepflanzte Art

G = gezielt angepflanzte Art

alle anderen: I, solange keine Zweifel oder Informationsbedarf
